Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

- I. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

A. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Gyory et al., US No. 3,671,048 (Gyory"). Gyory discloses a cassette seal comprising at least one dust barrier (21), the barrier consist of a non-woven material impregnated with polymer dispersion (Col. 3, lines 5-10 & lines 34-38).

i. The non-woven material (21) is disposed in a sealing manner at a rotating surface. The non-woven material is provided with a sealing lip (engaging shaft).

ii. The non-woven material has an inner edge and an outer edge (Fig. 4).

Examiner's note: Applicant has not positively claimed the outer and inner rings in claim 1, therefore dependent claims positively reciting outer and inner rings are being interpreted as being drawn towards an element that has not been positively claim and is given little patentable weight.

Claim Rejections - 35 USC § 103

II. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

A. Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Friewald US No., 4,746,128 ("Friewald") in view of Gyory.

i. Friewald discloses a cassette seal comprising a housing, an inner ring including a support ring and an outer ring including a stiffening ring. There is a woven material disposed between the support ring and the stiffening ring. The support ring comprises a radial flange with the nonwoven material fastened to the flange.

ii. Friewald does not disclose the nonwoven material impregnated with PTFE.

iii. Gyory discloses such a nonwoven material in order to insure prolonged effective operation (Col. 2, lines 22-25).

iv. It would have been obvious to one of ordinary skill in the art at the time of applicant's invention to modify Friewald as taught by Gyory in order to insure prolonged effective operation (Col. 2, lines 22-25).

III. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Enoch E Peavey whose telephone number is (571) 272-7061. The examiner can normally be reached on Mon-Fri 8:00 am to 4:30 am.
